SUMMARY

Final-year B.Des User Experience Design student with hands-on experience in UX/UI design, user research, usability testing, interaction design, wireframing, prototyping, and design systems. Experienced in designing user flows and intuitive digital experiences through industry internship, hackathons, and academic projects. Skilled in Figma, user-centered design, and UX evaluation.

WORK

Forbes Marshall

UX Intern Jun 2026 - Jul 2026 Pune, Maharashtra

Industrial HMI Redesign: Redesigned screen architectures and task flows for a flagship industrial boiler control system, improving navigation, action confirmation, and real-time status feedback.

Industrial Ergonomics: Conducted user research and persona mapping with floor operators and engineers to optimize touchscreen interactions for high-heat, noisy environments and PPE/glove usage.

Diagnostic Usability Framework: Developed the VIMM (Visual, Interactive, Memory, Muscle) framework to evaluate cognitive load, interaction friction, and workflow drop-offs.

Matrix-Based Testing: Developed 2x2 decision matrices correlating task duration, frequency, criticality, and input errors to identify failure points in complex machine interfaces.

Facilitation Tooling: Designed a 5-phase moderation toolkit to support facilitators and enable unbiased qualitative feedback during usability testing.

HMI Design Usability Testing Cognitive Ergonomics
Task Flow Optimization User Research Industrial UX

SKILLS

Design & Prototyping: Wireframing, Interactive Prototyping, Design Systems, Responsive Design, Visual Design

Research & Evaluation: User Research, Usability Testing, Interaction Design, User-Centered Design (UCD)

Tools & Software: Figma, Unity, Unreal Engine

ACTIVITIES & ACHIEVEMENTS

Competitions & Hackathons

- Samsung Hackathon: Designed an Agentic AI solution during a 24-hour sprint, mapping user flows and proactive interaction points.
- Yuj Designs Hackathon: Designed UX frameworks for Agentic AI, focusing on autonomous workflows and maintaining user control.

Research & Publications

- HCI Research: Authored and submitted a research paper examining how algorithmic dark patterns in food delivery applications influence everyday eating choices.
- Industry Engagement: Attended design and HCI conferences to explore emerging UX practices and gain industry exposure.

3D & Spatial Design

- 3D Environments: Modeled 3D assets in Blender and developed interactive environments using Unreal Engine and Unity.

Leadership & Campus Involvement

- Core Team Volunteer: Managed event logistics and experiential decor for major college events while coordinating cross-functional student teams.

EDUCATION

Bachelor of Design (B.Des) - 2023-2027

MIT Institute of Design - Pune, Maharashtra

Specialization: User Experience Design

Minor: Immersive Media Design

INTERESTS

I enjoy exploring human behavior, building 3D environments, and experimenting with physical tabletop games and tangible interactions to create designs that feel natural and intuitive.
